ALTERNATIVE TO MEDS CENTER

# Holistic Medication Tapering and Addiction Treatment

## Who we are

Refreshingly different. We look at mental health, pain and addiction through a physiological looking glass – based on scientific research, evidence-based findings, and results.

## Our mission

We believe that by and large, people are over-medicated and assigned a mental diagnosis that conveys a belief that something is permanently wrong with them. To our mind, there is a lot more involved in mental health and addiction treatment.

## What we do

Alternative to Meds Center uses the very best of the medical, psychotherapeutic and holistic worlds to provide you with the most complete integrative and transformative program offered in the country.
